

I Accept ALL Insurances but

Why I Don't Participate with All Insurance Plans

Dear Dr. or Patient,

The patients I treat are typically *specialized* cases. They have conditions which require special treatments and equipment *not available* in most offices. The cost for rendering these procedures are higher but a patient can expect *a faster recovery* with *better results*.

Most often my patients require:

1. Private Face-to-Face time (up to 30-40 minutes)
2. Special Instruction on movements and exercise
3. Special Supplies
4. Special Laser Therapy

Although we charge more per visit than the “standard” office, one can expect better results in *LESS VISITS* so the cost is typically *MORE AFFORDABLE*.

I look forward to serving those patients who are not improving under standard care, having financial difficulties, or having special needs. Please call if you would like detailed information on each of my special programs. I would love to meet and discuss your special needs.

Sincerely,

James Ko, PT
